

Senior IB Bio 3 Summer Assignment

Congratulations on completing your junior year. You have work so hard and deserve a relaxing summer. I do ask that you do complete the following two assignments

Part 1: Purchase the following study guide:

Oxford IB Study Guides - Biology for the IB Diploma by Andrew Allott, 2014 Edition
ISBN-13: 978-0198393511

Part 2: One big focus we will have senior year is your IA. Over the summer, you must come up with three IA proposals. Your proposals must include:

- a. Identifying the independent versus dependent variables
- b. Materials you will need to complete the IA
- c. An outline of how you plan to run your IA

We are in our brainstorming phase, but you will need to bring in a hard copy of your three proposals on the first day of school. During the first couple of weeks of school, we will discuss the Do's and Don'ts of the IA, evaluate your proposals, and refine/narrow your proposals to a viable IA to conduct throughout the first semester.

You will need to submit your proposal outlines to turnitin by August 1st

Class ID: 21225999
Enrollment key: IBsummerBio

Bonus: Did you have a connection with Biology this summer? Maybe you snorkeled and observed diversity at a coral reef, helped in a beach clean-up, etc. Send me a pic of you interacting with biological components along with an explanation. If I get enough pictures, I would like to create a collage of Nease's IB students interacting with biology outside of the classroom.

Lastly, enjoy your summer!
