

## Summer Assignment for IB HL AA

The first Friday of the Quarter you will have a summative on AB Calculus material. You are not required to do this over the summer, but it will be collected/checked on the first Friday of the 26-27 School Year.

This summer assignment will help prepare you for that Summative.

On a separate sheet of paper do the following for full credit:

1. Write the problem (no need to write words, just equations is fine)
2. Show all work related to answering the question.
3. Box the answer.
4. If you get it wrong, show that by marking it wrong and show the next problem you try.
5. You will be checked off for completing this assignment using the directions above and will be a formative grade.
